

Dear course participants,

the task sheet for Lab 1 is available in ILIAS, so you can start working on it!

To receive bonus points in the lab, you must present your findings in a presentation for each lab sheet, which will then be graded. Please pay attention to the following information for the further procedure. This applies later analogously according to the schedule also for Lab 2 and Lab 3.

Each group presents the results in a short presentation and demonstrates selected functions directly on the GNS3 group server. Each group will have 15 – 20 min total time for this. Please make sure that your presentation does not exceed a total duration of 10 minutes, as in the remaining time further comprehension questions will be asked or practical tasks will be executed on your GNS3 group server. Your presentation will be based on the tasks in the document and should be evenly distributed among all group members. At the beginning of your acceptance, the tutors will determine who will present which tasks.

Each group member must be able to demonstrate the solutions of all tasks on the GNS3 group server or explain them to the tutors! All solutions must be explained correctly and as clearly as possible to receive bonus points.

Please be sure to plan for the presentation to be possible no later than your group's last deadline for the lab sheet. So, if the period for Lab 1 is over, no more presentations can be made, and no more bonus points can be awarded for the old lab sheet. The time per group is limited and we cannot consider delays in the sign-off.

If you have any problems or questions, please contact us before handing in the regular sessions or by mail at ccn@fh-dortmund.de, we will be happy to assist you!

Until then, good luck in the lab,
Your CCN-Team
